Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record further failed to teach or disclose either singularly or in combination a circuit comprising: a first and a second operation unit, a pre-accumulation register coupled to the first operation unit and a memory coupled to the second operation unit. Each independent claim identifies the uniquely distinct features: "a selection block coupled to the memory, the second operation unit, the pre-accumulation and the first operation unit, wherein the selection block selects a second operand of the third set of operands from a set of potential operands, wherein the set of potential operands includes the second operation result, the buffered first operation result stored in the pre-accumulation register, and data stored in at least one of the plurality of memory locations of the memory, and wherein the selection block selects the second operand of the third set of operands based on operand selection information included in an operational code received by the circuit" (as per claims 1 and 6). The totality of the combination of elements recited in the present claims invention were not found to be anticipated, suggested or made obvious by the prior art of record.

The prior art of record further failed to teach or disclose either singularly or in combination a method for executing operation codes in a computer block, wherein the method comprises the uniquely distinct steps of: "selecting a first operand of a third set of potential operands that includes the buffered first operation result, wherein selecting the first operand of the

Art Unit: 2676

third set of operands occurs during a third cycle, wherein selecting the first operand of the third set of operands is based on a current operation code; and combining the second result and the buffered first operation result using a second operation unit during the third cycle to produce a third operation result" (as per claim 12). These distinct features of the present claims invention were not found to be anticipated, suggested or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
